  - Replacement of parts would be purely at the discretion of the company or its authorised agents as occurring or resulting from or attributable to negligence, abuse, misuse, or any operation or repair performed by unauthorised personnel.

### FAQs

**How does Pureit Classic G2 purify water?**

Pureit Classic G2 purifies water through a 6-stage purification process which includes:

1. Pre-Sediment Filter: Removes large particulates like sand, rust, and iron oxide.
2. Pre-RO Carbon Filter: Removes chlorine and other volatile organic compounds.
3. Membrane (RO): Produces pure water with a TDS of less than 50 ppm.
4. Post-RO Carbon Filter: Removes residual chlorine and other chemicals.
5. Post-Carbon Sediment Filter: Filters out particulate impurities.
6. Post-UV: Sterilises water with UV light for bacteria, virus, protozoa, and cysts.

**What should I do if a part of the filter needs to be replaced?**

- For the Pre-Sediment Filter, Pre-RO Carbon Filter, and Post-Carbon Sediment Filter, replace them as per the instructions in the manual.
- For the Germkill Kit, follow the instructions on when and how to replace it.

**What if I need to clean my filter?**

- Clean the Pre-Sediment Filter every 315 hours of pump running time or every 6 months from the date of installation based on the quality of your input water.
- Clean the Post-RO Carbon Filter every 150 hours of pump running time.

**How do I know when it’s time to replace the filter?**

- A digital indicator on the control panel will alert you when the filter needs replacing.
- You can also monitor the TDS level of your water to determine when a filter change is necessary.

**What is the performance of Pureit Classic G2?**

- Permeate flow rate: ~7 lit/min
- Recovery rate: 90% (min.)
- Ro-technology: 55 Watts
- Power rating: 55 Watts Maximum
- Material of construction: Food safe, non-toxic, engineering grade plastics
- Total hardness: 500 mg/lit (max.)
- Iron in input water: 0.3 mg/lit (max.)
- Total dissolved solids: 100 mg/lit (max.)
- Value of PH: 7.5 (max.)
- Dissolved oxygen: 0 mg/lit
- Electrical conductivity: 2000 μS/cm

**Can I open and service my purifier?**

- Pureit Classic G2 is a compact purifier and once installed, it is designed to be maintenance-free. However, some parts may need to be replaced or cleaned periodically. It is recommended to contact the nearest Pureit service center or the Authorised Licensed service provider with whom the device is in use.

**What is the life of the filter elements?**

- The life of filter elements depends on various factors such as water quality, usage, and location. Generally, the manufacturer recommends replacing filters based on the number of hours of operation or the usage frequency. Periodic filter replacement is crucial to maintain water purity and ensure the optimal operation of the purifier.

**Can I use the stored water for drinking?**

- The stored water in Pureit Classic G2 is safe for drinking. However, it is recommended to drink the water immediately after dispensing to ensure freshness. Also, check the expiration date of the stored water before consumption.

**Where can I find more information about pureit Classic G2?**

- Visit the Pureit website or contact your nearest Pureit service center for more detailed information about Pureit Classic G2 and its specifications.
OF PUREIT CLASSIC G2 PURIFIER

Every drop of water you drink is sweet and always safe.

100% FOOD GRADE PLASTIC***

HI-SPEED PURIFICATION OF UP TO 20 LITRES/HOUR*

Enriches water by adding essential minerals like Calcium and Magnesium.

Additional stage of purification that destroys bacteria, virus and parasites.

Additional stage of purification to further purify water.

Removes dissolved salts, hardness, pesticides and heavy metals like arsenic, lead and mercury, microbial contaminants like bacteria, virus, protozoa and cysts.

Removes chlorine, harmful bacteria, parasites and heavy metal like arsenic, lead and mercury, microbial contaminants like bacteria, virus, protozoa and cysts, heavy metals like lead and copper.

Two Bio-Ca Carbon Filters

RO Chamber

*Depending upon the device you purchased, it will either have UV Chamber or MF Membrane.

**Assumption: 5 membered family needing 20 litres of water every day (4 litres per person per day)  *** for all water contact parts.
